

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country journey in their RV. Freshly retired, after spending several years working with his brother to develop their crane company into a market leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

While on their trip, John spent time talking to previous business associates whom the Groves stopped to see along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered an infinite marketplace for a product that could quickly and safely lift individuals in the air to accomplish maintenance and other building functions.

Upon returning from their travels, John formed a partnership with two friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty workers, they designed and sold the first JLG aerial work platform. The business incorporates some of the basic design elements of that original lift into current versions.

JLG forklifts have come a long way since Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the company proudly continues to expand itself into various marketplaces globally and develops new products to make sure clients are capable of being more efficient and perform in the workplace within a safer environment.
