There are well over 220 Doosan service and product sales locations operating in Canada and the United States. What's more, there are more than 90 independent sellers moving forklift equipment and materials handling equipment. This system helps Doosan Infracore America to aggressively compete in this competitive market. The forklift product line remarkably comprises of 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these numerous truck models vary from 3,000 to 33,000 lbs. All trucks are manufactured in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing lift truck business in the North American marketplace, thanks to their reliability in retaining a high degree of client service quality and optimum product functioning to all Doosan Infracore Lift Truck users. The U.S. forklift division located in Cleveland has a expert team knowledgeable in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Originally the domestic lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. began in 1960, to import fully assembled lift trucks as part of a domestic machinery expansion project. Product sales of these goods were initially targeted to state-run corporations, large scale corporations, and the military. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training grew to become the new focus for enhancing quality and product development.

Home-based lift truck trade for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's advanced technological advancements combined with sales success placed them in a position of significant growth of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the highly competitive North American materials handling market. This project proved highly lucrative for Daewoo and their lift truck sales expanded greatly. In 1984, the company completed construction of a new facility to help in producing high end value-added goods for export. In 1993, the corporation had a global sales system and started exporting models they had developed through in-house technology, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into overseas markets.
